

Material Properties and Dimensions

Description

Western Excelsior manufactures a full line of Rolled Erosion Control Products (RECPs). Excel R-1 Rapid Go temporary Erosion Control Blanket is composed of a 100% machine produced High Altitude Rocky Mountain Aspen Excelsior matrix mechanically (stitch) bonded on two inch centers to a single photodegradable, synthetic net. The excelsior matrix consists of curled, machine produced fibers with greater than eighty percent longer than six inches. Excel R-1 Rapid Go blanket is available in natural color or dyed green and is recommended for use in channels or slopes requiring erosion protection for a period up to fifteen months. Actual field longevity is dependent on soil and climatic conditions.

Specifications

Each roll of Excel R-1 Rapid Go is manufactured under Western Excelsior’s Quality Assurance Program to ensure a continuous distribution of fibers and consistent thickness. Verified values are provided in Table 1 and product characteristics are provided in Tables 2 and 3. Values provided in Tables 1, 2 and 3 represent expected values at the time of manufacture. Installation instructions and performance data are available from Western Excelsior’s Technical Support Division.
