

WESTERN EXCELSIOR DOCUMENTATION UPDATED

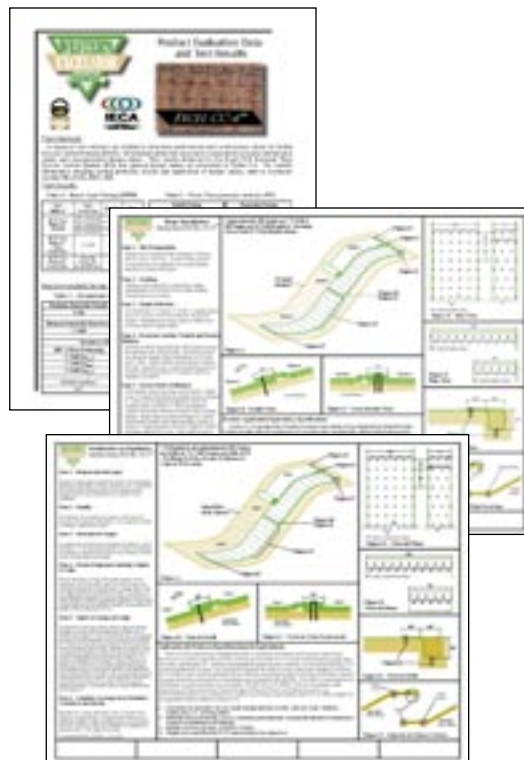

NEW PERFORMANCE AND INSTALLATION DOCUMENTATION AVAILABLE

Release Date: 4/17/07

Western Excelsior continuously improves its products and the documentation supporting those products. Documentation available within www.westernexcelsior.com have now been updated to include the most recent performance data, regulatory conformance listings and usage upgrades.

Within the performance documentation for each Rolled Erosion Control Product (RECP), verification of testing by the National Transportation Product Evaluation Program (NTPEP) is now provided for recently tested products. Further, verification of completed testing conducted by Texas Transportation Institute (TTI) is also provided for recently tested products. This information is presented in addition to design values previously available.

Additionally, Western Excelsior now provides installation instructions in dwg and pdf format. Further, all RECP installation instructions are provided in English and in Spanish. Recognizing the growing need to supply documentation in multiple languages, Western Excelsior is now providing this documentation in Spanish to help ensure quality installations. Installation instructions in dwg format are available in the Technical Resources section, within the Design and Use subcategory.

Examples of new performance documentation and installation instructions. Review product documentation or the technical resources section to view and download the new, updated documents.

Visit www.westernexcelsior.com to keep updated on new products, services and support available from Western Excelsior. Further, industry updates and educational updates are made available through Western Excelsior Update.
