

**New Products Now Available – Brining In a Wide Load  
15 Foot Wide Straw Erosion Control Blankets**

5/1/06

For Immediate Release

Western Excelsior is continuously upgrading the products supplied to its distributors. Providing performance proven Rolled Erosion Control Products in configurations that increase shipping efficiency and provide labor savings is a requirement of many erosion control projects. To that end, Western Excelsior has acquired equipment and developed manufacturing techniques to produce ECBs as wide as fifteen feet.

Now available from Western Excelsior, Excel SR-1 and Excel SS-2 are offered in fifteen foot wide varieties. These rolls are packaged in bundles of sixteen. Fourteen bundles may be shipped on a single flatbed truck. The wider rolls are preferred for covering large areas with minimal seams. Each product is manufactured to the same weight, thickness and tensile properties as the more narrow variety. Documentation for the new products can be found at [westernexcelsior.com](http://westernexcelsior.com). Pricing for the new products may be obtained from your local Western Excelsior distributor.
